

Top Tip from Airtel-Vodafone

How to... Get the most out of 4G

Because you will be using data differently on 4G, here are a few tips to help you manage your data usage and get the most out of 4G.

1. To get started you will need to have a 4G enabled handset, check whether your handset is 4G enabled at www.gsmarena.com or in store
2. For Airtel-Vodafone customers, you will need to enable LTE/4G manually by inputting the network APN: airtel-ci-gprs.com. Without this APN, 4G will not be live on the Airtel-Vodafone network
3. 4G uses more data but remember you get a far superior experience - you can do a lot more in a shorter space of time
4. Speed tests are heavy on data usage, so rather consider the enhanced experience you get with 4G
5. 4G uses more battery so use our battery saving tips to help
6. Remember that downloading or updating apps can use a lot of data
7. Consider turning off push notifications to avoid unnecessary data usage
