

Samsung Galaxy S7 Edge - is this their best phone ever?

In a word, yes! The Galaxy S7 Edge has been hailed by critics as the best smartphone in the world right now, and it certainly lives up to the hype.

The sleek and stylish S7 Edge is beautifully designed with a vivid 5.5 inch quad-HD screen. Running on Android 6.0 Marshmallow and jam-packed with innovative features, this phone is fast and responsive, with a microSD card slot for up to 200GB of extra storage. I find the 12MP camera great in all conditions, especially in low light, and there's also an impressive 5MP front-facing camera for taking the perfect selfie.

However, the most outstanding feature of the S7 Edge is that it's IP68 water resistant! Essentially you can immerse this handset in 1.5m of water for up to 30 minutes without damaging it. Accidental toilet drop? No worries! If you are a butter-fingered klutz like me, then this feature will be your saving grace.

Available in black or gold 32GB, with no upfront costs when you take out an airtime plan. Pop in-store for more details.
