

## Data Roaming Cap Explained

Your data roaming usage is capped at approximately 250Mb, after which services will be barred.

The rate at which usage is charged depends on the country in which you are roaming. For full details of current roaming rates please visit [www.airtel-vodafone.com](http://www.airtel-vodafone.com)

If you wish to continue using data roaming services once cap has been reached, the account holder must contact our customers services team to request data services to be resumed and cap re-added.
